

GUSTAVO ALENCAR MATOS

AI Internship | Software Engineering | Automation

Guarulhos, Brazil | +55 11 99812-5317 | galencarmatos@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Software Engineering student with hands-on experience in AI products, automation, and software development. Works on projects involving LLM integration, n8n workflows, REST APIs, back-end development, and web and mobile interfaces. C1 English proficiency.

TECHNICAL PROJECTS

BinGo | Front-end, UI/UX, and AI | 2026 - present

- Develops the mobile app front-end in Flutter and Dart and contributes to UX, the collection kiosk interface, and AI features for a gamified electronic waste disposal ecosystem.
- Implemented mission journeys, impact tracking, and navigation through BinGopolis, connecting the mobile experience with the physical kiosk flow.

PraxUs AI | AI layer | 2nd place - 2026 ENIAC Lab Innovation Hackathon

- Designed the AI layer for an adaptive debt collection solution that personalizes communication based on context and user interactions.
- Orchestrated multiple LLMs using n8n, REST APIs, webhooks, and JSON, distributing interpretation and generation tasks to balance quality, cost, and availability.

ARAS | Back-end and AI | 2026 Experimenta Guarulhos Hackathon

- Developed back-end logic and AI integration to structure and standardize initial service records at Brazilian social assistance centers.
- Kept human validation in the workflow and contributed to the TypeScript interface integration.

Additional Projects | Team development

- EscovAcao: Android app built with Java and XML, featuring timers and educational content to support children's oral hygiene habits.
- PagVan: web system built with PHP, JavaScript, and MySQL for managing students, routes, attendance, and school van payments.

EDUCATION

Bachelor's Degree in Software Engineering | ENIAC University Center | 2026 - Dec. 2028

Technical Diploma in Information Technology | ENIAC High School | Expected Dec. 2026

TECHNICAL SKILLS

AI and automation: LLM integration, n8n, REST APIs, webhooks, JSON

Development: JavaScript, TypeScript, Python, Java, PHP, Dart/Flutter, HTML, CSS

Data and tools: MySQL, PostgreSQL, Git, GitHub, Vercel, Visual Studio Code

COURSES AND LANGUAGES

Additional training: Mastering AI - ENIAC (30 hours); Technical Visit to IBM - IBM SkillsBuild/ENIAC (3 hours, Aug. 2026)

Languages: Portuguese (native); English C1 (advanced); Spanish B1 (intermediate)
