Profile

Software Engineering student at ENIAC with experience in academic projects and hackathons involving LLM integration, n8n automation, and REST APIs. Contributions to back-end development and web and mobile interfaces. I adapt to different contexts and enjoy building solutions that make everyday tasks easier.

Selected projects

PraxUs AI

AI integration | 2nd place at the 2026 ENIAC Lab Innovation Hackathon

- Built n8n workflows and integrations using REST APIs, webhooks, and JSON for an adaptive communication solution for debt collection operations.
- Implemented a two-stage workflow: GPT interprets the context and generates a report, then Llama drafts the responses. Built as a team project; the AI workflow is currently disabled.

ARAS

Back-end and AI integration | 2026 Experimenta Guarulhos Hackathon

- Contributed to back-end logic, data structuring, and AI integration for initial social assistance records, with human validation and contributions to the TypeScript interface.

BioScan

Technical collaboration | Best Theme Project at FECEG 2026

- Contributed to the software and educational prototype for comparing hand images before and after washing and estimating the visible area covered by a fluorescent marker, with camera integration and a tablet interface.

BinGo

Front-end and UI/UX | Team product under development

- Develop Flutter/Dart interfaces for an electronic waste disposal ecosystem, including missions, impact tracking, and a collection kiosk interface.

Education

Software Engineering | ENIAC University Center

2026 to December 2028 | In progress

Secondary Education with Technical Training in IT | ENIAC High School

Expected completion in December 2026

Skills and languages

AI and integration: LLMs, GPT, Llama, n8n, REST APIs, webhooks, and JSON.

Technologies used in projects: JavaScript, TypeScript, Java, PHP, Dart/Flutter, HTML/CSS, MySQL, and PostgreSQL. Tools: Git, GitHub, and Vercel.

Training: Dominando a IA, ENIAC (30 hours); Google Cloud Capacita+ - Construa com o Gemini (participation, 2 hours, September 2026).

Languages: Portuguese (native), English (advanced, C1), and Spanish (intermediate, B1).
